

Flexible Tip Bougie™

Articulating Tip, Easy Slide Control

- Increases chance of successful intubation
- Articulating tip flexes into best position to pass through vocal cords
- Easy one-handed operation
- High visibility tip glows in UV light

Complete Control at Your Fingertips

The Flexible Tip Bougie™ is a universal, disposable, and articulating bougie for use with adult oral endotracheal tubes with an inner diameter of 7mm and higher. Its one-handed operation makes it an ideal aid when establishing an airway. The tip of the device can easily be maneuvered up and down by manipulating the device's slider tabs while inserting the fluorescent tip through the vocal cords.
